MAYA DWI LATIFAH

085814717514 | mdwilatifah@gmail.com | Linkedin | Portofolio | JL. Budi Swadaya Kebon Jeruk West Jakarta

Information Systems graduate from Universitas Bina Sarana Informatika (UBSI) with a GPA of 3.87/4.00 and 2 year of experience in Software Quality Assurance, Mobile Testing, and User Acceptance Testing across Android and web platforms. Experienced in validating user journeys, executing Functional, Regression, Integration Testing (SIT), and end to end testing, as well as documenting and tracking defects using Azure DevOps and JIRA. Familiar with API Testing using Postman, JSON payload validation, HTTP status codes, and debugging application behavior to ensure system reliability and data accuracy. Proven ability to collaborate with developers, analysts, and stakeholders in Agile environments to deliver high quality software products.

Work Experience

TRIBUN NETWORK - **Jakarta** Jul 2026 - Nov 2026

Quality Assurance Engineer
the largest regional and national news media in Indonesia.

- Executed functional and regression testing across Android, iOS for Tribun X, validating critical user flows before and after each release, including beta testing before Play Store release and post-release revalidation.
- Tested Firebase Remote Config and the CMS backend, verifying that configuration and content changes were reflected correctly in the app.
- Tested the Tribun X AI feature, evaluating which prompts produced the most suitable news outputs and validating results against feedback from the data team.
- Performed API testing with Postman, validating endpoints, JSON response structures, HTTP status codes, and data consistency between backend and app.
- Validated end-to-end MYVALUE and Tribun Booking flows (voucher redemption, point usage, event ticket purchase), plus basic load testing with JMeter simulating 100 concurrent booking requests.

PT MID SOLUSI NUSANTARA (MEKARI) - **Jakarta** Dec 2025 - May 2026

Solution QA | internship
An Indonesian SaaS company providing cloud-based business software for HR, finance, and operations.

- Executed end-to-end (E2E), functional, and regression testing on mobile android application and web-based applications by designing and executing 350+ structured test cases (positive, negative, and edge cases) for UAT on a client website (Finance PT. CIMB Niaga), validating system functionality against business requirements.
- Collaborated with stakeholders to align UAT and SIT scenarios with real user needs and business processes.
- Identified, documented, tracked, and reported software defects using Jam Dev with clear reproduction steps, screenshots, and supporting evidence to facilitate efficient issue resolution. Analyzed Product Requirement Documents (PRD) and user manuals in collaboration with System Analysts and product manager to ensure accurate and requirement driven test coverage.
- Validated API responses using Postman by verifying JSON structures, response codes, and data consistency against business requirements.

PT KOMPAS MEDIA NUSANTARA (HARIAN KOMPAS) - **Jakarta** May 2025 - Dec 2025

Quality Assurance Engineer Manual | internship
A leading media company in Indonesia under Kompas Gramedia, focused on journalism and digital publishing.

- Executed manual testing (functional, smoke, SIT, and regression) on mobile Android applications using Azure DevOps in Agile environments (daily stand-ups, sprint planning, sprint reviews).
- Created and executed 40+ positive & negative test scenarios Gherkin language across Android user journeys and interface flows.
- Performed UAT testing for AIKo on Kompas.id, validating new user journeys, detecting inconsistencies, and ensuring paywall, feedback, and AI response flows worked as intended, while preparing sign-off reports to document testing outcomes.
- Performed post-release validation on Kompas.id to verify released features and key user flows in production, while identifying and investigating application issues.
- Collaborated with engineering & product teams to refine test coverage and reduce post-release bugs.

Education

Universitas Bina Sarana Informatika - **Jakarta, Indonesia** Sep 2022 – Aug 2026

information Systems, 3.87 / 4.00
Relevant coursework: Software Testing, Risk Management, System Analysis & Design, Business Process Mapping

- Hands-on experience in UI/UX design, data analysis, and business intelligence
- Developed web-based information systems and analytical dashboards using MySQL, Looker Studio, Tableau, and Power BI
- Conducted comprehensive software testing, including unit testing and User Acceptance Testing (UAT), to ensure system functionality aligned with business requirements

SMK Telkom Sandhy Putra Jakarta - **Jakarta, indonesia** Jul 2019 - Jul 2022

Student in Teknik Jaringan Akses Telekomunikasi

Project Experience

UX Research & UI/UX Design for Rice-Selling Website agen sri rizki Cengkareng, West Jakarta

Course : interaksi manusia dan komputer (IMK) | Project Document IMK

- Understand the principles of optimizing applications for high performance and scalability.
- Ensured user-friendly interface & experience through iterative testing Developed wireframes & prototypes using Figma.
- Conducted user interviews and surveys to gather insights on user needs and pain points.
- Supported business users during UAT by validating requirements and resolving feedback collaboratively.
- This project demonstrated my ability to translate user needs into user-friendly and effective designs.

Historical Artifact Discovery Application

Course : Website Service Technology | TWS Document Project

- Conducted functional & usability testing to ensure optimal application performance.
- Developed test cases to validate system functionalities and ensure seamless user experience.
- Tracked testing progress, logged defects, and worked with developers to resolve reported issues.
- Collaborated with developers to resolve reported issues.

Enterprise Resource Planning (ERP) Design of Sales Information System at PT Surya Inti Aneka Pangan (SIAP)

Course : Enterprise Resource Planning (ERP) | Project Document ERP

- Analyzed sales workflows in an ERP system to ensure compliance with business policies.
- Conducted requirement analysis and collaborated with the development team to implement standardized workflows.
- Assisted in system validation testing, ensuring 95% compliance with organizational standards
- Collaborated with the development team to implement features ensuring reliability, scalability, and ease of use.
- Tested and validated system performance to ensure reliability and usability.

Organizational Experience

Himpunan Mahasiswa Sistem Informasi - Jakarta Sep 2022 – Sep 2023

Education Division

- Organized and managed internal and external collaborations for educational events.
- Conducted event agenda briefings to various stakeholders, including committee members, within one week.
- Guided and assisted participants during events by providing clear directions.

Skills and Certifications

- **Hard Skills** : Manual & Automated Testing, Functional Testing, Regression Testing, System Validation, Test Case Design, Compliance Monitoring, Risk Assessment, SDLC, JIRA, SQL, Bug Tracking & Reporting, Documentation, Spreadsheet, Microsoft Excel, Microsoft Word, Microsoft PowerPoint, Business Process Mapping, Report Automation, Application & System Configuration, Meeting Scheduling & Documentation, Google Colaboratory, Gherkin language, Postman, Testrail, Trello, Github, Azure DevOps, Agile/Scrum, Selenium (basic automation), API Testing (Postman), Generative AI Tools, Test Planning, Programming/Scripting: JavaScript (basic), System Workflow Documentation, HTML (Basic), Jmeter (Basic), database management, Notion, Jam Dev, HTTP status codes, and JSON structures, Grafana, Analytics Debugging, Event Tracking Validation, Playwright (Basic), katalon (basic), STLC
- **Soft Skills** : Attention to detail & Analytical thinking, Problem-solving & Critical thinking, Risk analysis & Time management, Communication skills, Teamwork and collaboration, Adaptability & Initiative, Decision-making, Documentation skills & Process improvement, Bug detection & Test planning
- **Language**: Indonesia, English
- **Course** (2026): TOEFL - Universitas Bina Sarana Informatika
- **Course** (2026): Enterprise Resource Planning (ERP) - PT. Sumihai Teknologi Indonesia
- **Course** (2026): Program Analyst - BNSP
- **Course** (2025): Project/product management - Myskill
- **Course** (2025): UI/UX Design - Udemy
- **Course** (2024): Dasar data scientist - Dicoding
- **Course** (2024): Belajar Dasar Structured Query Language (SQL) - Dicoding
- **Course** (2024): Mini Course - Data Analyst Revou
- **Certificate** (2024): IT Bootcamp Software Development
